

FEATURE:

The water chiller is to provide a cooling process in plastic molding, to improve quality of molded products and shorten period of injection molding cycles. Hence maximizes productivity of plastic molding manufacturing.

- ◎ Famous brand new compressors, high efficient shell condensers and evaporators-excellent cooling, quiet with low electric consumption.
- ◎ P.I.D. Microprocessor control-easy to operate, accurately maintains temperature range from 3°C to 50°C.
- ◎ Special open type reservoir tank with stainless steel-easy to clean and maintain.
- ◎ Well designed and reasonable pipelines-ensures power supply and saves energy.
- ◎ Current-overload protector, high-and-low pressure switches, electronic time delayer, fault display system-safe and durable.
- ◎ Liquid crystal display showing temperatures of outlet and inlet chill water-provides visualized and direct setting.
- ◎ Single, double or quadruple compressors combination available--economical and efficient.
- ◎ Industrial designed-elegant and ergonomic

Note: 1. Cooling Capacity is calculated based on : inlet/outlet chilled fluid temperature :12°C/7°C, inlet/outlet cooling water temperature :30°C/35°C.
2. Working condition: Chilled fluid temperature : from 5°C to 35°C. Inlet/outlet chilled fluid Temperature difference: from 3°C to 8°C.
Cooling water temperature: from 18°C to 37°C, Inlet/outlet cooling water Temperature difference: from 3.5°C to 10°C.
We reserve the right to modify above information without prior notice.
